Security Wristband fitting

Staff will secure a Security Wristband on all runners. This wristband is required for entering the start area on the race day.

You cannot remove the wristband until you finish and exit the finish area.

The part of the wristband that touches against your skin is made out of very safe materials that are used, for example, in medical treatment, toys, and food containers. With its excellent water-resistance and durability, you can take showers with the wristband on and it will not easily tear in your daily activities. We also have applied protection on the printed surface of the wristband to prevent color loss or staining,

*The above maynot apply depending on the environment or conditionain which the wristband is used. If you feel any disconfort or changes in your physical conduction due to the wisiband, take off the wisiband immediately and contact the Tolyo Marathon (inity Dest (RE:+81-80-2233-7758).
